Notes:

1. Computed continuous current assumes the condition of T_{J_Max} while the actual continuous current depends on the thermal & electro-mechanical application board design.
2. This single-pulse measurement was taken under T_{J_Max} = 175°C.
3. This single-pulse measurement was taken under the following condition [L = 100μH, V_{GS} = 10V, V_{DS} = 30V] while its value is limited by T_{J_Max} = 175°C.
4. The power dissipation P_D is based on T_{J_Max} = 175°C.
5. This value is guaranteed by design hence it is not included in the production test.
