

DESCRIPTION:

With high ability to withstand the shock loading of large current, JCTx12 series of silicon controlled rectifiers provide high dv/dt rate with strong resistance to electromagnetic interference. They are especially recommended for use on solid state relay, motorcycle, power charger, T-tools etc.

From all three terminals to external heatsink, JCTx12A provides a rated insulation voltage of 2500 V_{RMS}, and JCTx12F provides a rated insulation voltage of 2000 V_{RMS}, complying with UL standards (File ref: E252906).
